

BORROWED INTELLIGENCE | Overall day and night

A continuous spine links three commons; cyan outlines show conceptual focus areas

Day: legible focus areas, continuous public space

Night: warm routes, cyan collaboration network

Memory calibrates intelligence; wellbeing measures the future.

North to south: 01 Zhongzhiyuan / 02 AI Origin / 03 Dazhongsi. North distant, south foreground. Outlines locate design intentions; buildings and landscape are illustrative. Night arcs are graphic concepts, not physical structures or photometry.

Overall structure | Public ground and proposed interfaces

Separate public references, unscaled prototypes and AI-generated intentions

A01 / BORROWED INTELLIGENCE

Site context | Read Jing-Zhang in the actual city

Public reference ground + participant relationships | WGS84 source / EPSG:4548 map

© OpenStreetMap contributors / ODbL / snapshot 2026-08-11 / Colored connections are proposals; no exact statutory boundary

V1.4 / 2026-10-06

Public reference ground / OSM snapshot 2026-08-11

A02 / BORROWED INTELLIGENCE

Overall structure | One spine, two wings, three commons

Public reference ground + participant relationships | WGS84 source / EPSG:4548 map

© OpenStreetMap contributors / ODbL / snapshot 2026-08-11 / Colored connections are proposals; no exact statutory boundary

V1.4 / 2026-10-06

One spine, two wings, three commons / Colored links are proposals

A03 / BORROWED INTELLIGENCE

Walking and landscape | Three gaps, three responses

Separate the relationships: routes, links, rest and service

01 Qinghe: continuity

Continuous walking and shaded rest

Audit gaps, then connect bank paths and places to rest.

02 Two gateways: legibility

Link arrivals to ordinary services

About 880 m straight-line at district scale; not one court.

03 Dazhongsi: places to pause

Make transfers useful public space

Verify crossings individually; provide seats and staffed help first.

Spatial strategy / Unscaled; verify exact routes, permission and engineering conditions

V1.4 / 2026-10-06

Provisional design model / Routes imply no access or works permission

D02 / BORROWED INTELLIGENCE

Public-space components | Seven everyday supports

Unscaled functional prototypes; not construction details, equipment specifications or cost commitments

C01 Memory trace

C02 View frame

C03 Wellbeing shelter

C04 Accessible link

C05 Deliberation table

C06 Landscape edge

C07 Open-data marker

Concept design · Relationships and functions · Not a statutory or engineering plan

V1.4 / 2026-10-06

Seven components / Unscaled; details and dimensions require design

Zhongzhiyuan • Civic Validation Commons

Separate public references, unscaled prototypes and AI-generated intentions

AI-generated concept; unscaled, not an existing-condition reconstruction or implementation approval. Labels are separate editable text.

B01F / BORROWED INTELLIGENCE

Zhongzhiyuan | Observe outside, test inside

Spatial prototype / Distinct buildings, courts and routes

- 01 Observe outside**
The public loop stays outside tests and reaches discussion and results.
- 02 Validate inside**
Test trajectory and admission boundary are explicit; a responsible lead stops tests.
- 03 Independent service**
Equipment, materials and maintenance use separate rear access.

Spatial strategy / Unscaled; verify exact routes, permission and engineering conditions

V1.4 / 2026-10-06

Functions/circulation prototype / Unscaled

B01 / BORROWED INTELLIGENCE

Zhongzhiyuan • Civic Validation Commons | Site interfaces

Public reference ground + participant relationships | WGS84 source / EPSG:4548 map

- Public understanding and controlled tests**
Observation route stays outside test yards
Organize research, logistics and service separately
Verify ring-road, rail and water crossings
- Blue-green relationship**
Support a continuous route and landscape observation
Test limits depend on safety and operations
Water geometry does not imply intervention permission
- How to use this design ground**
Solid ground: frozen OSM snapshot
Colored interfaces: participant proposals
Routes, hours, ownership and management to verify
Develop the functional prototype separately

- Public building outlines
- Road reference
- Water reference
- Mapped green space
- Proposed links (dashed)

© OpenStreetMap contributors / ODbL / snapshot 2026-08-11 / Colored connections are proposals; no exact statutory boundary

V1.4 / 2026-10-06

Separate actual public anchors and unverified interfaces

Retain people and ordinary services / Optional AI enhancement

AI Origin • Origin Living Commons

Separate public references, unscaled prototypes and AI-generated intentions

AI-generated concept; unscaled, not an existing-condition reconstruction or implementation approval. Labels are separate editable text.

B02F / BORROWED INTELLIGENCE

AI Origin | One living seam, three shared courts

Spatial prototype / Distinct buildings, courts and routes

- 01 Quiet court**
Shade and rest sit off the through-route, offering a quieter option.
- 02 Discussion court**
Round tables, a shared ground floor and paper maps support discussion.
- 03 Resource court**
Staffed directories and referral support daily needs; booked research stays separate.

Spatial strategy / Unscaled; verify exact routes, permission and engineering conditions

V1.4 / 2026-10-06

Functions/circulation prototype / Unscaled

B02 / BORROWED INTELLIGENCE

AI Origin • Origin Living Commons | Site interfaces

Public reference ground + participant relationships | WGS84 source / EPSG:4548 map

© OpenStreetMap contributors / ODbL / snapshot 2026-08-11 / Colored connections are proposals; no exact statutory boundary

V1.4 / 2026-10-06

District scale / Two gateways, one seam

Gateways are two transit-arrival interfaces
Public anchors: about 880 m apart
Straight-line distance is not a walking route

Prototype scale / Shared courts

Resource, discussion, quiet and night functions
Candidates imply no selected building or permission
Court renderings do not compress the two stations

How to use this design ground

Solid ground: frozen OSM snapshot
Colored interfaces: participant proposals
Routes, hours, ownership and management to verify
Develop the functional prototype separately

- Public building outlines
- Road reference
- Water reference
- Mapped green space
- Proposed links (dashed)

Retain people and ordinary services / Optional AI enhancement

Dazhongsi • Slow Intelligence Commons

Separate public references, unscaled prototypes and AI-generated intentions

AI-generated concept; unscaled, not an existing-condition reconstruction or implementation approval. Labels are separate editable text.

B03F / BORROWED INTELLIGENCE

Dazhongsi | Arrival, culture and everyday life

Spatial prototype / Distinct buildings, courts and routes

- 01 Cultural pause**
Interpretation and free seating turn arrival into a place to pause.
- 02 Public ground floors**
Staffed help, cash payment and paper information come first.
- 03 Connect four areas**
Verify each crossing separately; abstract diagonals are not walking routes.

Spatial strategy / Unscaled; verify exact routes, permission and engineering conditions

V1.4 / 2026-10-06

Functions/circulation prototype / Unscaled

B03 / BORROWED INTELLIGENCE

Dazhongsi | Two stations, four public interfaces

Public ground / Candidate interfaces and connections

- 01 Culture**
Actual cultural anchors inform interpretation; locate interfaces through field work.
- 02 Arrival**
Identify both stations separately; study four-area links segment by segment.
- 03 Sharing**
Ground floors, rest and services are candidate interfaces, not confirmed access.

Unverified connections Numbers mark candidate interfaces, not parcels

© OpenStreetMap contributors / ODBL / Snapshot 2026-08-11 / Proposed links / Issue #1029 pending

V1.4 / 2026-10-06

Separate actual public anchors and unverified interfaces

Retain people and ordinary services / Optional AI enhancement

Twelve Scenarios | Six priority eye-level scenes

Ordinary services first, optional AI enhancement, human responsibility for every scene

S01 / Century Memory Lens

Help visitors understand memory and its sources

Baseline: Authentic remains, a timeline, printed maps, and human interpretation

Heritage interpreter checks facts; remove incorrect generated content

S03 / Four-Season Comfort Route

Rest in summer shade and winter shelter

Baseline: Shade, rain cover, drinking water, rest points, and seasonal maintenance

Manager confirms weather and maintenance; faults revert to signs and inspection

S04 / Accessible Together

Travel continuously from arrival to service

Baseline: Ramps, tactile and high-contrast information, continuous rest, and human assistance

Professionals and users verify access; no accessibility promise before checking

S08 / Community Deliberation Agent

Bring different views onto one shared map

Baseline: In-person meetings, paper comments, human facilitation, and public minutes

Human facilitation and records; participants correct, AI never replaces voting

S09 / Open Validation Booking

Understand testing rules before applying

Baseline: On-site notices, paper applications, and human safety briefings

Test lead controls admission and stopping; separate public route from test trajectories

S10 / Slow-Intelligence Retail Assistant

Obtain explanations or use ordinary checkout

Baseline: Ordinary menus, cash and standard checkout, staffed advice, and clear prices

Merchant checks prices/allergens; recommendations can be disabled

Twelve Scenarios | Six facility/service scenes

Ordinary services first, optional AI enhancement, human responsibility for every scene

S02 / Quiet Borrowed-View Path

Find a quiet alternative to the commuter route

Baseline: Continuous signs, a quiet alternative route, seating, and shade

Operator checks noise and route; show unverified states explicitly

S05 / Time-Equity Navigation

Compare speed, reliability and care burden

Baseline: Standard maps, service times, staffed information, and route options

Transport operator checks timetables/routes; stale data leaves recommendations

S06 / Public-Space Steward

Know who handles a reported fault

Baseline: Inspection sheets, cleaning and repair requests, notices, and a staffed hotline

Manager confirms and assigns jobs; publish aggregate status, not identities

S07 / Blue-Green Urban Twin

Observe landscape change and model limits

Baseline: Rain gauges, planting information, human monitoring, and evacuation rules

Professional caretaker verifies alerts; model does not replace flood/engineering decisions

S11 / Innovation Resource Foyer

Bring a question to negotiable resources

Baseline: Service directories, fixed opening hours, and human referrals

Providers maintain hours/permissions; no guaranteed match or outcome

S12 / Public Wellbeing Ledger

Public information point Proposed fields	
Memory	Interpretation + corrections Archive source / Reviewer / Correction version
Time	Arrival + waiting burden Route record / Sample time / Different users
Comfort	Shade, noise + places to rest Observation method / Season + weather / Fault state
Trust	Explanation, appeals + correction Rule version / Responsible person / Appeal status
Proposed fields / No measured values yet / Sources and missing states stay visible	

See improvements, burdens and uncertainty

Baseline: Periodic disclosure, printed reports, hearings, and complaint channels

Operator and independent reviewer verify data; aggregate results only

Operations and evidence | Supply, verify, feedback, exit

Separate public references, unscaled prototypes and AI-generated intentions

Eight elements: supply, validation, feedback and exit

Participant concept · No confirmed partners, resources or permissions · Not a geographic map

Resource supply → Risk-based validation → Four Ledgers feedback → Provider adjustment

Exit: withdrawn permission, false access, discrimination, absent takeover or upkeep → Stop AI, restore low-tech service, record reason

V1.1 · visual/assets/ecosystem-review.json · sources.json · 2026-10-05

Regional interfaces: send issues, return evidence

Participant concept · No confirmed partners, resources or permissions · Not a geographic map

V1.1 · visual/assets/ecosystem-review.json · sources.json · 2026-10-05

Eight elements / Negotiable, no resources or investment promised

Five two-way regional interfaces / Not confirmed partnerships

FIGURE 05 / BORROWED INTELLIGENCE

Metrics · Evidence · AI Governance

Design conclusions must be recomputable, traceable, verifiable, and open to revision by future evidence.

数据 / Data: metrics.json · assumptions.json · sources.json · matrices | Authority order: GeoJSON → Metrics → Evidence → Human Gate all three core metrics: confidence low

D01 / BORROWED INTELLIGENCE

Brand and wayfinding | An open borrowed-view frame

Original mark proposal; no third-party logos or official identity

Concept design · Relationships and functions · Not a statutory or engineering plan

V1.4 / 2026-10-06

Low-confidence provisional metrics / Never inferred from images

Original identity / Physical information first, digital optional
